|Helpdesk And Support

By linking your incoming support emails to VARION, you can keep track of open issues across projects and make sure your customers are happy by answering on time. You can also create help articles and build a support portal that will make your customers get what they need even faster.

Bill Of Materials

Maintain the list of all materials and operations that are required in making your finished product. Assign cost to each material and get insights of the total cost of production. Be on top of the materials required during production in real time.

Production Orders

Track the orders for production floor, automatically track material movements as VARION interlinks production orders, bill of materials and inventory. Track the progress with timesheets and record successful production by registering finished goods.

Development Centers : India | Singapore | Mexico

Inventory Management

Easily manage multiple inventory locations.

Track inventory levels per warehouse and

update based on manual inspection.

Batches, serial numbers, stock valuation and

automated inventory accounting help you be

on top of stock.

Accounting

your accounting operations consists of 3 main transactions:

Sales Invoice: The bills that you raise to your Customers for the products or services you provide.

Purchase Invoice: Bills that your Suppliers give you for their products or services.

Journal Entries: For accounting entries, like payments, credit and other type.

- Pricing Rule

| HR & PAYROLL

The Human Resources (HR) Module covers the processes linked to managing a team of co-workers.

Most important feature here is processing the payroll by using Process Payroll to generate Salary Slips.

Most countries have complex tax rules stating which expenses the company can make on behalf of the Employees.

There are a set of rules for the company to deduct taxes and social security from employee payroll. VARION allows to accommodate all types of taxes and their calculation.
